

# WebSensor - remote thermometer with Ethernet interface

code: T0510

Ambient temperature t-line Web sensor. Remote alarm.  
Web Sensor with built-in temperature sensor.

## Processing and analysis of measured data:

- online in [COMET Cloud](#)
- [COMET Database](#) software
- [integration into 3-party systems](#)

## Technical data

|                             |   |
|-----------------------------|---|
| TEMPERATURE SENSOR          |   |
| Measuring range             | -30 to +80 °C                           |
| Accuracy                    | ±0.6 °C                                 |
| Resolution                  | 0.1 °C                                  |
| GENERAL TECHNICAL DATA      |   |
| Operating temperature       | -30 to +80 °C                           |
| Channels                    | internal temperature sensor             |
| Output                      | Ethernet                                |
| Measuring interval          | 2 s                                     |
| Available temperature units | degrees Celsius, degrees Fahrenheit     |
| Communication protocol      | WWW, ModbusTCP, SNMPv1, SOAP, XML       |
| Alarm protocols             | E-mail, SNMP Trap, Syslog               |
| Power                       | 9-30 Vdc                                |
| Protection class            | IP30                                    |
| Dimensions                  | 88,5 x 126 x 39,5 mm; stem length 53 mm |
| Weight                      | approx. 145 g                           |
| Warranty                    | 3 years                                 |
