

Web sensor - remote thermometer hygrometer with Ethernet interface, cable 4 meters

code: T3511-4

Ambient temperature, relative humidity t-line Web sensor. Remote alarm. Web Sensor with relative humidity and temperature probe. The device is supplied with T+RH probe on the cable.

High precision capacitive polymer sensor ensures excellent long term calibration stability and ultimate accuracy. Dual line LCD is an advantage. Measured values are also converted to other humidity interpretation: dew point temperature, absolute humidity, specific humidity, mixing ratio and specific enthalpy.

The device is supplied with T+RH probe with 4 meters cable.
